

Our first meeting of 2012 will be on Wednesday, January 4 at 7 PM at the Puyallup Library. Our guest speaker will be Chris Raynham, the manager of Pack Forest.

Chris will discuss results of current research being conducted at Pack Forest, the results of the sludge applications about 15 years ago, the impact of forest and fish on Pack Forest operations, and the long-range plans at Pack Forest (given the loss of the Dept of Forestry). And, of course, Chris will answer your questions.

It should be a very educational meeting. See you there!
